EXPERIENCE

SpringUP Labs — Business Analyst Intern

Feb 2023 – Feb 2024

Pune, India

- Supported JCB UK's migration from Lotus Notes to Microsoft Architecture using Power BI, SharePoint, Power Automate, and Power Apps; modernized workflows and improved team productivity.
- Developed a Power Apps vendor management application tracking new vendor requests end-to-end; automated request status updates and approval workflows using Power Automate, reducing processing time by 30% and improving operational efficiency.
- Documented workflows, technical specifications, and reporting logic for migrated Microsoft solutions; partnered with cross-functional teams to support user adoption and training.

ACADEMIC PROJECTS

Pharmaceutical Market Share & Cannibalization Analysis

Nov 2025 – Dec 2025

- Merged 1M+ Medicare claims from 5 datasets and filtered to 28,000+ injectable anesthesia records using HCPCS/CPT codes; joined HCP demographics, patient data, territory mapping, and diagnosis specialties.
- Performed 4-product market share analysis (2016–2018) at claims, patient, and HCP level; pinpointed top 5 territories with sharpest YoY variant brand decline and benchmarked against primary competitor volume trends.
- Segmented HCPs by new vs. continuing prescriber behavior and specialty; analyzed patient age trends across 7 cohorts to develop sales force deployment and Non-Personal Promotion strategies to recover market share.

CVM Healthcare Analytics

Sept 2025 – Oct 2025

- Tracked CVM claim share within total Medicare procedures across 2016–2018 using HCPCS/CPT codes; built 100% stacked bar charts surfacing year-over-year shifts to inform HCP targeting and sales force strategy.
- Segmented HCPs into 4 CVM claim-volume tiers (Disease Aware to High-Volume Prescribers); mapped each tier to optimal sales deployment strategy, allocating In-Person vs. Non-Personal Promotion efforts by segment.
- Segmented CVM patients into 4 age cohorts (18–59, 60–69, 70–79, 80+); tracked year-over-year claim volume changes per group from 2016–2018 to guide marketing budget positioning and promotional strategy allocation.

New York Housing Market Analysis

Feb 2025 – Apr 2025

- Analyzed 4,800+ New York real estate listings across 6 property types using Python (Pandas, NumPy); performed data cleaning, outlier removal, and feature engineering to prepare dataset for exploratory analysis.
- Conducted correlation and trend analysis on pricing drivers including property size, beds, baths, and location; built Matplotlib and Seaborn visualizations identifying top localities by price per sq ft and average sale price.

Telco Customer Churn Prediction

Jan 2026 – Mar 2026

- Supported data collection and preparation of 20,000+ customer records across 15+ behavioral features using SQL and Python; performed validation ensuring accuracy of analytical inputs and KPI reporting outputs.
- Performed trend and variance analysis on customer behavioral data to identify performance patterns; built 3+ dashboards surfacing key metrics and communicated findings to cross-functional stakeholders.

EDUCATION

Stevens Institute of Technology

May 2026

Master of Science in Business Intelligence & Analytics | Hoboken, NJ

Savitribai Phule Pune University

July 2023

Bachelor of Computer Science | Pune, India

SKILLS

Technical: SQL (PostgreSQL), Python (Pandas, NumPy), Power BI (DAX), Microsoft Excel (Advanced), Tableau, Google BigQuery (GCP)

Tools & Platforms: Power BI, Tableau, Excel (Advanced), Jupyter Notebook, Git, Google BigQuery (GCP), SQL, Python
