EXPERIENCE

SpringUP Labs — Business Analyst Intern

Feb 2023 – Feb 2024

Pune, India

- Led technical setup for a client migration from Lotus Notes to Microsoft Architecture using Power BI, SharePoint, Power Automate, and Power Apps to modernize operations.
- Contributed to a team-built Power Apps vendor management application; designed Power Automate workflows to automate status updates and approval routing based on completion triggers, cutting processing time by 30%.
- Produced process documentation, system guides, and knowledge transfer materials for migrated solutions; collaborated with business users to validate workflows and ensure smooth adoption.

ACADEMIC PROJECTS

Real Madrid Analytics System

Apr 2026 – May 2026

- Engineered an ML pipeline using XGBoost for match outcome prediction and a Monte Carlo simulation across 10,000 La Liga seasons; trained on 5 seasons of match data using rolling form, Elo ratings, and xG features.
- Developed a player recruitment engine scoring 1,281 players across 4 major leagues against position-weighted benchmarks; deployed a 7-page AI-assisted Streamlit analytics dashboard to Streamlit Community Cloud.

Telco Customer Churn Retention Dashboard

Jan 2026 – Mar 2026

- Designed and executed a multi-layer SQL pipeline in PostgreSQL transforming raw IBM Telco records into a customer segmentation and risk cohort model ready for churn analysis.
- Built a 3-page Power BI executive dashboard using DAX to surface churn rate, revenue at risk, and retention priorities; revealed Month-to-Month and Electronic Check customers as the highest churn-risk segments.

New York Housing Market Analysis

Feb 2025 – Apr 2025

- Identified property size and bathrooms as the strongest price drivers across 4,800+ New York listings using AI-assisted Python analysis; removed outliers, engineered a Price-Per-SqFt metric, and filtered 6 property categories.
- Uncovered premium localities and street-level luxury concentrations through correlation analysis and 8+ visualizations; evaluated broker performance to surface high-value market positioning insights for investors.

CVM Healthcare Analytics

Sept 2025 – Oct 2025

- Analyzed three years of historical Medicare claims to measure CVM procedure share against total market volume; visualized year-over-year market trends that informed HCP targeting and sales force strategy.
- Segmented HCPs into 4 CVM claim-volume tiers (Disease Aware to High-Volume Prescribers); mapped each tier to optimal sales deployment strategy, allocating In-Person vs. Non-Personal Promotion efforts by segment.

EDUCATION

Stevens Institute of Technology

May 2026

Master of Science in Business Intelligence & Analytics | Hoboken, NJ | GPA: 3.6/4.0

Savitribai Phule Pune University

July 2023

Bachelor of Computer Science | Pune, India

SKILLS

Technical: SQL (PostgreSQL), Python (Pandas, NumPy, XGBoost), Power BI (DAX), Microsoft Excel (Advanced), Tableau, Google BigQuery (GCP)

Tools & Platforms: Power BI, Tableau, Excel (Advanced), Streamlit, Jupyter Notebook, Git, Google BigQuery (GCP), AI-Assisted Analytics
